

Hakkımızda

D'arte Grup, doğal taş, mermer, granit, traverten, onyx, bazalt ürünleri ile dünyadaki lider bir ithalatçı, üretici ve küresel bir trend belirleyicidir. D'arte Şirketler Grubu, 2000 yılından bu yana ihracat ve ithalat sektöründe en büyük ve en başarılı gruplardan biri olarak doğal taş pazarında yer almaktadır.

D'arte Grup'un bir Türk yatırımı olan global tedarik zincirimiz, her yıl dünya çapında yüzlerce konteyner ihraç ettiğimiz münhasır yurtdışı ortaklığı üzerine inşa edilmiştir ve ayrıca Türkiye, Avrupa ve ABD gibi dünyanın farklı bölgelerinde yatırımcılara sahip olmak bizim için onurdur.

20 yılı aşkın bir süre boyunca faaliyetlerimizi farklı alanlarda genişlettik ve sektörün en rekabetçi fiyatları ve her seferinde zamanında teslimat ile yüksek teknoloji tesislerle birinci sınıf malzemeler tedarik etme konusunda küresel itibar kazandık. 2020 yılında dünyanın ekonomik durumu durgun sularda seyrederken Almanya'nın Mannheim şehrinde D'arte firmasının yatırımları tüm hızıyla devam etti. Aynı yıl plaka ve seramik üreticisi İtalyan Angelo firması ile 5 yıllık distribütörlük anlaşması imzalayarak etkileyici faaliyetlerine devam etti.

Doğal taşta özgün tasarımımıza rağmen profesyonel mimarlarımızın ilham veren tasarımlarıyla aksesuar alanında da etkili adımlar attık. Tüm faaliyetlerinde sürekli gelişmeyi ve uluslararası standartlara uyumu göz önünde bulundurarak, ülkemizde ulaştığımız başarı, adım adım dünya oyuncusu olma yolunda hızla ilerlemektedir.

About Us

D'arte group is a leading importer, manufacturer and a global trendsetter in the world of Natural Stone. Since 2000, D'arte Company has been in the natural stone market as one of the largest and most successful groups in export and import sector.

As a Turkish investment of D'arte Group, our global supply chain is built on exclusive overseas partnership from which we export hundreds of containers worldwide each year and also it is our honor to have investors in different regions of the world such as Turkey, Europe, and USA.

Over a span of 20 years, we expanded our activities in different areas and have achieved the global reputation of supplying top-notch materials with the high-tech facilities at the industry's best competitive prices and on-time delivery in every time. In 2020 While the economic situation of the world was stagnant, the investments of D'arte company in Mannheim, Germany continued at full speed. In the same year, it continued its impressive activities by signing a 5-year distribution agreement with Angelo, ceramic, tile, slab and furniture producer Italian firm. Despite our unique design in natural stone, we have taken effective steps in the field of accessories with the inspired Designs of our professional architects.

With taking into consideration of continuous development and harmonization with international standards in all its activities, the success we have reached in our country is progressing rapidly on his way to becoming a world player gradually step by step.

MARBLE

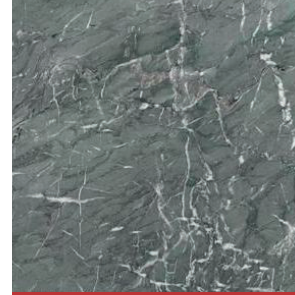

Marble is a metamorphic rock resulting from the recrystallization of limestone. However, commercially, all calcareous rocks produced by nature and able to polishing are called marbles. All marbles are not suitable for all building constructions. They have different uses for any kind of marbles. In general, light-colored marble is difficult to maintain in flooring applications with heavier traffic and dark marble tends to show more scratching. Overall, it's a classic architectural material and appropriate for a variety of applications from countertops to building facades.

MERMER

Mermer, metamorfik hareketlerin zamanla oluşturduğu kireçtaşının ısı ve basınca maruz kalmasıyla oluşur. Çoğunlukla mineral kalsitten (CaCO_3) oluşmakta ve genellikle kil mineralleri, mikalar, kuvars, pirit, demir oksitler ve grafit gibi diğer mineralleri de içerir. Tüm mermerler bina inşaatı için uygun değildir. Her mermerin farklı kullanım alanları vardır. Genel olarak klasik bir mimari malzemedir ve çeşitli uygulamalar için uygundur. Bina cephelerine, tezgahlara zemin ve duvar döşemelerinde kullanılır.

TRAVERTINE

Travertine is a natural stone such as Marble, Granite, Onyx, Limestone, Slate, etc. The main difference between Travertine and other natural stones is in the formation of the rock, the hardness of stone, and the appearance. Travertine stone constitutes in the hot springs and/or limestone caves and it is not the same as Marble or limestone, which falls in the metamorphic rock category. The main feature of travertine stone is its holes within the stone, which caused by carbon dioxide evasion.

TRAVERTEN

Traverten, Mermer, Granit, Oniks, Kireçtaşı, Arduvaz vb. Gibi doğal bir taştır. Traverten ile diğer doğal taşlar arasındaki temel fark, taşın oluşumunda, taşın sertliğinde ve görünümündedir. Traverten taşı kaplıcalarda ve / veya kireçtaşı mağaralarında oluşur ve metamorfik kaya kategorisine giren Mermer veya kalker ile aynı değildir. Traverten taşın temel özelliği, karbondioksit kaçışından kaynaklanan taş içerisindeki delikleridir.

— GRANITE

Granite has known as an igneous rock derived from molten masses or magmas and along with other crystalline rocks, constitutes the foundation of the continental masses. It is the most common rock exposed at the earth's surface and is usually whitish or gray with a speckled appearance caused by the darker crystals. The specific gravity of granite ranges from 2.63 to 2.75. Its crushing strength is from 1050 to 14.000kg per sq. cm (15.000 to 20.000 lb. per sq. in). It has greater strength than sandstone, limestone, and marble and is correspondingly more difficult to quarry. It is an important building stone that the best grades are extremely resistant to weathering. So these Features make it a popular choice for counter tops and outdoor coverings such as paving and etc.

— GRANİT

Granit, erimiş kütlelerden veya magmalardan türetilen magmatik bir kaya olarak bilinir ve diğer kristalin kayalarla birlikte kıtasal kütlelerin temelini oluşturur. Dünya yüzeyinde en yaygın görülen kayadır ve genellikle beyazımsı veya gridir ve daha koyu kristallerin neden olduğu benekli bir görünüme sahiptir.

— LIMESTONE

Limestone is a classic architectural material and fantastic choice for versatility and durability. It has many benefits that is suitable for a variety of applications from floors to walls to facades; primarily, that it is a durable material with visually pleasing aesthetics. It is also waterproof and heatresistant, so it is great for kitchen countertops, bathroom tiles, flooring, fireplaces, door surrounds, stairs and much more. Our offering of limestone tile, slabs includes modern and minimal selections, with fossils that are microscopic, rather than highly visible.

— KİREÇ TAŞI

Kireçtaşı, klasik bir mimari malzeme ve çok yönlülük ve dayanıklılık için harika bir seçimdir. Zeminden duvarlara, cephelere kadar çeşitli uygulamalar için uygun olan birçok faydası vardır; öncelikle görsel olarak hoş bir estetiğe sahip dayanıklı bir malzeme olmasıdır. Aynı zamanda su geçirmez ve ısıya dayanıklıdır, bu nedenle mutfak tezgahı, banyo karoları, yer döşemeleri, şömineler, kapı çerçeveleri, merdivenler ve çok daha fazlası için harikadır. Kireçtaşı karo, plakalarımız, oldukça görünür olmaktan çok mikroskobik fosiller içeren modern ve minimal seçimler içerir.

— ONYX : EN

Onyx is a highly decorative material notable for its crystalline structure, dramatic color and translucency, which is especially noticeable in backlit applications. It is a great alternative stone to granite, marble and other stone surfaces. Onyx countertops offer a complicated and wonderful design with bold colors and swirling patterns. Onyx can utilize for countertops and walls. We offer various Onyx color options that adapt to your home or office.

— ONYX : TR

Onyx, özellikle arkadan aydınlatmalı uygulamalarda dikkat çeken kristal yapısı, çarpıcı rengi ve yarı saydamlığı ile dikkat çeken oldukça dekoratif bir malzemedir. Granit, mermer ve diğer taş yüzeylere harika bir alternatif taştır. Onyx tezgahlar, cesur renkleri ve dönen desenleri ile karmaşık ve harika bir tasarım sunar. Onyx tezgahlar ve duvarlar için kullanılabilir. Evinize veya ofisinize uyum sağlayan çeşitli Onyx renk seçenekleri sunuyoruz.
